Professional Summary

Civil Engineer with professional experience in site supervision, engineering control, and monitoring the execution of infrastructure and large-scale construction projects in compliance with engineering specifications, quality standards, and safety requirements. Experienced in overseeing civil works, preparing technical reports, monitoring project schedules, and managing potential risks on construction sites. Knowledgeable in environmental requirements, regulatory compliance, and sustainability practices within development projects. Skilled in coordinating with multidisciplinary teams, analyzing field challenges, and implementing effective solutions to ensure efficient project delivery. Certified by the Saudi Council of Engineers with a strong commitment to engineering excellence and achieving project objectives.

Professional Experience

Engineering Control Specialist - Emdad Al Khebrat | Infrastructure Projects, Holy Makkah Municipality | November 2024 – Present

- Supervise excavation and field execution activities to ensure compliance with approved engineering specifications.
- Monitor the implementation of occupational health and safety requirements on project sites.
- Inspect work quality and verify conformity with technical drawings and project standards.
- Prepare daily and technical reports while documenting observations and project progress.
- Coordinate with stakeholders and project teams to ensure timely execution of activities.

Site Civil Engineer - Larsen & Toubro | NEOM Green Hydrogen Project | January 2024 – November 2024

- Supervised civil construction activities and monitored project progress on site.
- Provided technical support and guidance to construction teams and technicians.
- Conducted site inspections to ensure compliance with engineering standards and specifications.
- Monitored environmental compliance requirements and supported related assessments.
- Coordinated with project stakeholders to achieve quality objectives and schedule commitments.

Education

Bachelor of Civil Engineering - Umm Al-Qura University, Makkah, Saudi Arabia | August 2018 – June 2023

Projects

NEOM Green Hydrogen Project – NEOM

- Participated in supervising civil works within one of the Kingdom's largest clean energy projects.
- Monitored construction quality and compliance with engineering and environmental standards.
- Contributed to site inspections and field monitoring activities.

Infrastructure Projects – Holy Makkah Municipality

- Supervised excavation and civil infrastructure activities.
- Ensured compliance with safety procedures, quality requirements, and project specifications.

Certifications and Training Courses

- Project Management Professional (PMP) – 35 Training Hours
- Lean Management and 6 Sigma
- Professional Site Civil Engineer Preparation – 40 Training Hours
- Saudi Building Code
- Quantity Surveying
- AutoCAD 2023
- Certified by the Saudi Council of Engineers

Memberships

- Saudi Council of Engineers
